AutoCAD was originally a subdivision of a company called Symbol Technologies, which was later purchased by Autodesk. Autodesk, Inc. is the corporate owner of AutoCAD, including the software's source code, and the rights to use the name "AutoCAD". As of 2012, Autodesk, Inc. sold AutoCAD for Windows, OS X, iOS, and Android operating systems, along with AutoCAD LT (inclusive of a simplified version of AutoCAD called AutoCAD Classic), AutoCAD WS, and AutoCAD Map 3D. Overview AutoCAD is an integrated development environment (IDE) for engineering applications (it is used to create 2D and 3D models, drawings, and documentation), as well as being a CAD application. AutoCAD is the most used CAD application for engineers, architects, and construction workers. The program features a powerful tool set and automation abilities, and has been used for developing 2D and 3D drawings, visualizations, and animations. History AutoCAD was originally called InfiniteCAD. Autodesk acquired the brand name "AutoCAD" in 1989. The first public release of AutoCAD was AutoCAD Drafting and Drawing for DOS, and Windows 1.0. AutoCAD 1.1 was released in 1989, and AutoCAD 2.0 in 1991. The first release of AutoCAD to be purchased by more than one company was AutoCAD 1993 Release 1, and AutoCAD LT was added. AutoCAD Release 2 was also the first release of AutoCAD to support Windows NT, which was released at the same time as NT 3.5. The first version of AutoCAD to support the Windows 95 operating system was AutoCAD 2.1. AutoCAD has since been updated a number of times. AutoCAD 2004 Release 11 added support for WDDM drivers. Find a sequence  $\{x_n\}$  such that  $A(x_n) = 0$ ,  $A(x) > 0$ . I'm confused about how to approach this problem. I understand that it could be easily solved by contradiction, but I need some help with choosing  $\{x_n\}$ . Thanks in advance! A: As you noted, the continuity of  $A$  gives us that we can assume that  $x_n \rightarrow 0$ . But then  $A(x_n) = 0$  for all  $n$ . So the claim is true. Q: Why are my UI views partially showing when I set the contentView of my UIViewController in viewDidLoad? I am currently creating a game and I need to show the score after the user presses a button in my game, so I set up a UI view containing a label that I can use to display the score. In my view controller, I created a UIView, and added a subview to it (a UILabel). Then, I used this code to add the subview to the view controller's contentView: `self.scoreLabel = [[UILabel alloc] initWithFrame:CGRectMake(0, 100, 200, 30)]; [self.contentView addSubview:self.scoreLabel];` My issue is that when I
