When you hover over each of the buttons on the top row, a div appears underneath it. It's a simple effect, but I've been looking at it for two hours and cant figure it out. The code I have is this:

```
.form1 div { position: absolute; top: 35px; left: 100px; color: white; margin: 0px; font-size: 26px; background-color: #373737; padding: 10px 20px; }
jQuery(document).ready(function($) { $('div').hide(); $('div').show(function() {
$('div').css({"position":"absolute"}); $('div').css({"top":"35px"}); $('div').css({"left":"100px"});
}); $('a').hover( function() {
```
